TABLE 676

COAT AND SUIT INDUSTRY

PERCENTAGE OF MANUFACTURING EMPLOYEES WHOSE EARNINGS
FOR WEEK ENDED MARCH 9, 1934, EQUALED OR EXCEEDED
THE PRESCRIBED CODE STANDARDS, BY SELECTED
CRAFTS AND BY MARKET AREAS

	Estimated Number in U.S.	New York City	Eastern Area (Excluding N.Y.C.)	Baltimore	Western Area (Excluding Baltimore)
			(Percentage of Employes at or Above Code Minimum)		
Cutters.....	2,983	95	82	60	86
Operators, male	18,643	96	94	95	93
Operators, female...	4,704	77	86	40*	69
Finishers, male.....	4,827	91	73	50	90
Finishers, female...	8,489	92	73	76	88
Finishers' helpers, male.....	363	96	82	50	100
Finishers' helpers, female.....	4,141	91	90	89	93
Pressers, under.....	1,986	92	95	73	89
Pressers, upper.....	1,729	97	96	100	94
Pressers, machine...	1,105	84	61	62	97
Pressers, non-clas- sifiable.....	2,592	97	87	77	95
			(Percentage Employes at or Above Code "Average")		
Operators, male.....	53	36	54	41
Operators, female...	6	1	11	15
Finishers, male.....	38	17	0	15
Finishers, female...	23	11	24	24
Finishers' helpers, male.....	39	14	14	56
Finishers' helpers, female.....	28	6	12	6
Pressers, under.....	64	17	40	30
Pressers, upper.....	74	50	46	50
Pressers, machine...	61	23	38	41
Pressers, non-clas- sifiable.....	73	62	46	39

*This figure probably should be somewhat higher because of the tendency of employers incorrectly to classify many of their semi-skilled female operators as full-fledged operators.

NOTE: Number of employees who worked a specified number of hours per week may be calculated by multiplying the total number of employees by the percentage shown for the group. For example, in January 1934, the number of male employees who worked less than 20 hours per week would be determined as follows: 7.56% (the percentage for the group) X 87,863 (the total number of male employees) = 6644 (the number of male employees who worked less than 20 hours per week).

-1033-

NOTE: Number of employees who worked a specified number of hours per week may be calculated by multiplying the total number of employees by the percentage shown for the group. For example, in January 1934, the number of male employees who worked less than 20 hours per week would be determined as follows: 7.56% (the percentage for the group) X 87,883 (the total number of male employees) = 6644 (the number of male employees who worked less than 20 hours per week).

Source: Based on tabulations of the Bureau of the Census from reports submitted by members of the industry covering one week's operations in each month. National Recovery Administration Division of Review. Report of Survey Committee on the Operation of the Code for the Boot and Shoe Manufacturing Industry, July 16, 1935.

Classification	No. of Workers Employed	Total Wages Paid to Group	Man-hours Worked	Average hours per Worker	Average Wage for Group per Hour
* Foremen	37	1,521	1,548	42	98½
Foremen and Assistants under \$35.	11	336	440	40	76¼
* Construction and Maintenance	42	1,181	2,133	50-3/4	55½
Watchmen, Porters, Cleaners, & Time-keepers	105	2,085	5,257	50	39½
Common Labor	88	1,514	3,234	36½	47
Lacquerers	10	148	448	44-3/4	33
Non-Productive Labor,					
* Skilled & Semi-Skilled	123	2,379	4,593	37½	51-3/4
Apprentices & Learners	19	149	574	30	26
Miscellaneous	382	6,195	14,316	37½	43¼
TOTAL	5,860	\$107,266	201,448	34¼	53¼

In 1932 there were less than 1% of the wage earners who were paid less than 35¢ per hour.

The workers marked * are skilled, 2866; those unmarked are unskilled, 2994.

OFFICE OF THE NATIONAL RECOVERY ADMINISTRATION
THE DIVISION OF REVIEW

THE WORK OF THE DIVISION OF REVIEW

Executive Order No. 7075, dated June 15, 1935, established the Division of Review of the National Recovery Administration. The pertinent part of the Executive Order reads thus:

The Division of Review shall assemble, analyze, and report upon the statistical information and records of experience of the operations of the various trades and industries heretofore subject to codes of fair competition, shall study the effects of such codes upon trade, industrial and labor conditions in general, and other related matters, shall make available for the protection and promotion of the public interest an adequate review of the effects of the Administration of Title I of the National Industrial Recovery Act, and the principles and policies put into effect thereunder, and shall otherwise aid the President in carrying out his functions under the said Title. I hereby appoint Leon C. Marshall, Director of the Division of Review.

The study sections set up in the Division of Review covered these areas: industry studies, foreign trade studies, labor studies, trade practice studies, statistical studies, legal studies, administration studies, miscellaneous studies, and the writing of code histories. The materials which were produced by these sections are indicated below.

Except for the Code Histories, all items mentioned below are scheduled to be in mimeographed form by April 1, 1936.

THE CODE HISTORIES

The Code Histories are documented accounts of the formation and administration of the codes. They contain the definition of the industry and the principal products thereof; the classes of members in the industry; the history of code formation including an account of the sponsoring organizations, the conferences, negotiations and hearings which were held, and the activities in connection with obtaining approval of the code; the history of the administration of the code, covering the organization and operation of the code authority, the difficulties encountered in administration, the extent of compliance or non-compliance, and the general success or lack of success of the code, and an analysis of the operation of code provisions dealing with wages, hours, trade practices, and other provisions. These and other matters are canvassed not only in terms of the materials to be found in the files, out also in terms of the experiences of the deputies and others concerned with code formation and administration.

The Code Histories, (including histories of certain NRA units or agencies) are not mimeographed. They are to be turned over to the Department of Commerce in typewritten form. All told, approximately eight hundred and fifty (850) histories will be completed. This number includes all of the approved codes and some of the unapproved codes. (In Work Materials No. 18, Contents of Code Histories, will be found the outline which governed the preparation of Code Histories.)

(In the case of all approved codes and also in the case of some codes not carried to final approval, there are in NRA files further materials on industries. Particularly worthy of mention are the Volumes I, II and III which constitute the material officially submitted to the President in support of the recommendation for approval of each code. These volumes

9768--1.

set forth the origination of the code, the sponsoring group, the evidence advanced to support the proposal, the report of the Division of Research and Planning on the industry, the recommendations of the various Advisory Boards, certain types of official correspondence, the transcript of the formal hearing, and other pertinent matter. There is also much official information relating to amendments, interpretations, exemptions, and other rulings. The materials mentioned in this paragraph were of course not a part of the work of the Division of Review.)

THE WORK MATERIALS SERIES

In the work of the Division of Review a considerable number of studies and compilations of data (other than those noted below in the Evidence Studies Series and the Statistical Material Series) have been made. These are listed below, grouped according to the character of the material. (In Work Materials No. 17, Tentative Outlines and Summaries of Studies in Process, these materials are fully described).

Industry Studies

Automobile Industry, An Economic Survey of
Bituminous Coal Industry under Free Competition and Code Regulation, Economic Survey of
Electrical Manufacturing Industry, The
Fertilizer Industry, The
Fishery Industry and the Fishery Codes
Fishermen and Fishing Craft, Earnings of
Foreign Trade under the National Industrial Recovery Act
Part A - Competitive Position of the United States in International Trade 1927-29 through 1934.
Part B - Section 3 (e) of NIRA and its administration.
Part C - Imports and Importing under NRA Codes.
Part D - Exports and Exporting under NRA Codes.
Forest Products Industries, Foreign Trade Study of the
Iron and Steel Industry, The
Knitting Industries, The
Leather and Shoe Industries, The
Lumber and Timber Products Industry, Economic Problems of the
Men's Clothing Industry, The
Millinery Industry, The
Motion Picture Industry, The
Migration of Industry, The: The Shift of Twenty-Five Needle Trades From New York State, 1926 to 1934
National Labor Income by Months, 1929-35
Paper Industry, The
Production, Prices, Employment and Payrolls in Industry, Agriculture and Railway Transportation, January 1923, to date
Retail Trades Study, The
Rubber Industry Study, The
Textile Industry in the United Kingdom, France, Germany, Italy, and Japan
Textile Yarns and Fabrics
Tobacco Industry, The
Wholesale Trades Study, The
Women's Neckwear and Scarf Industry, Financial and Labor Data on

Part E. Agreements under Sections 4(a) and 7(b)

Part F. A Type Case: The Cotton Textile Code

Labels Under NRA, A Study of

Model Code and Model Provisions for Codes, Development of

National Recovery Administration, The: A Review of its Organization and Activities
NRA Insignia

President's Reemployment Agreement, The

President's Reemployment Agreement, Substitutions in Connection with the
Prison Labor Problem under NRA and the Prison Compact, The

Problems of Administration in the Overlapping of Code Definitions of Industries and Trades,
Multiple Code Coverage, Classifying Individual Members of Industries and Trades

Relationship of NRA to Government Contracts and Contracts Involving the Use of Government
Funds

Relationship of NRA with States and Municipalities

Sheltered Workshops Under NRA

Uncodified Industries: A Study of Factors Limiting the Code Making Program

Legal Studies

Anti-Trust Laws and Unfair Competition

Collective Bargaining Agreements, the Right of Individual Employees to Enforce
Commerce Clause, Federal Regulation of the Employer-Employee Relationship Under the
Delegation of Power, Certain Phases of the Principle of, with Reference to Federal Industrial
Regulatory Legislation

Enforcement, Extra-Judicial Methods of

Federal Regulation through the Joint Employment of the Power of Taxation and the Spending
Power

Government Contract Provisions as a Means of Establishing Proper Economic Standards, Legal
Memorandum on Possibility of

Industrial Relations in Australia, Regulation of

Intrastate Activities Which so Affect Interstate Commerce as to Bring them Under the Com-
merce Clause, Cases on

Legislative Possibilities of the State Constitutions

Post Office and Post Road Power -- Can it be Used as a Means of Federal Industrial Regula-
tion?

State Recovery Legislation in Aid of Federal Recovery Legislation History and Analysis

Tariff Rates to Secure Proper Standards of Wages and Hours, the Possibility of Variation in
Trade Practices and the Anti-Trust Laws

Treaty Making Power of the United States

War Power, Can it be Used as a Means of Federal Regulation of Child Labor?

THE EVIDENCE STUDIES SERIES

The Evidence Studies were originally undertaken to gather material for pending court cases. After the Schechter decision the project was continued in order to assemble data for use in connection with the studies of the Division of Review. The data are particularly concerned with the nature, size and operations of the industry; and with the relation of the industry to interstate commerce. The industries covered by the Evidence Studies account for more than one-half of the total number of workers under codes. The list of those studies follows:

Automobile Manufacturing Industry	Leather Industry
Automotive Parts and Equipment Industry	Lumber and Timber Products Industry
Baking Industry	Mason Contractors Industry
Boot and Shoe Manufacturing Industry	Men's Clothing Industry
Bottled Soft Drink Industry	Motion Picture Industry
Builders' Supplies Industry	Motor Vehicle Retailing Trade
Canning Industry	Needlework Industry of Puerto Rico
Chemical Manufacturing Industry	Painting and Paperhanging Industry
Cigar Manufacturing Industry	Photo Engraving Industry
Coat and Suit Industry	Plumbing Contracting Industry
Construction Industry	Retail Lumber Industry
Cotton Garment Industry	Retail Trade Industry
Dress Manufacturing Industry	Retail Tire and Battery Trade Industry
Electrical Contracting Industry	Rubber Manufacturing Industry
Electrical Manufacturing Industry	Rubber Tire Manufacturing Industry

THE STATISTICAL MATERIALS SERIES

This series is supplementary to the Evidence Studies Series. The reports include data on establishments, firms, employment, Payrolls, wages, hours, production capacities, shipments, sales, consumption, stocks, prices, material costs, failures, exports and imports. They also include notes on the principal qualifications that should be observed in using the data the technical methods employed, and the applicability of the material to the study of the industries concerned. The following numbers appear in the series:

9768--5.

Asphalt Shingle and Roofing Industry
Business Furniture
Candy Manufacturing Industry
Carpet and Rug Industry
Cement Industry
Cleaning and Dyeing Trade
Coffee Industry
Copper and Brass Mill Products Industry
Cotton Textile Industry
Electrical Manufacturing Industry

Fertilizer Industry
Funeral Supply Industry
Glass Container Industry
Ice Manufacturing Industry
Knitted Outerwear Industry
Paint, Varnish, and Lacquer, Mfg. Industry
Plumbing Fixtures Industry
Rayon and Synthetic Yarn Producing Industry
Salt Producing Industry

THE COVERAGE

The original, and approved, plan of the Division of Review contemplated resources sufficient (a) to prepare some 1200 histories of codes and NRA units or agencies, (b) to consolidate and index the NRA files containing some 40,000,000 pieces, (c) to engage in extensive field work, (d) to secure much aid from established statistical agencies of government, (e) to assemble a considerable number of experts in various fields, (f) to conduct approximately 25% more studies than are listed above, and (g) to prepare a comprehensive summary report.

Because of reductions made in personnel and in use of outside experts, limitation of access to field work and research agencies, and lack of jurisdiction over files, the projected plan was necessarily curtailed. The most serious curtailments were the omission of the comprehensive summary report; the dropping of certain studies and the reduction in the coverage of other studies; and the abandonment of the consolidation and indexing of the files. Fortunately, there is reason to hope that the files may yet be cared for under other auspices.

Notwithstanding these limitations, if the files are ultimately consolidated and indexed the exploration of the NRA materials will have been sufficient to make them accessible and highly useful. They constitute the largest and richest single body of information concerning the problems and operations of industry ever assembled in any nation.

L. C. Marshall,
Director, Division of Review.
